Kids' Coloring Book on Amazon KDP: One-Day Setup Guide

Prepared 28 September 2026 from the reel you saved (isaaccc.mp4 on Instagram, posted 23 September 2026 (https://www.instagram.com/reel/Ddp3KenxxqY/)). It covers KDP's costs and royalties, KDP's rules on AI content, the EveryGen tool and a free alternative, and other platforms for the same pages. Every link in this guide was opened while checking these facts, or appears in the reel. Where a number is not published or could not be checked, the guide says so rather than guessing.

---

1. The verdict

The arithmetic first

For the book the reel describes (8.5 x 11 in paperback, black ink, white paper, 24 to 110 pages), Amazon.com charges a flat **$2.84** to print each copy. KDP's formula is: royalty = (royalty rate x list price) - printing cost. The rate is 50% up to $9.98 and 60% from $9.99. (Paperback Royalty (https://kdp.amazon.com/en_US/help/topic/G201834330), Paperback Printing Cost (https://kdp.amazon.com/en_US/help/topic/G201834340))

List price on Amazon.com	Rate	Your royalty per copy	Copies sold to earn $100
$5.99	50%	$0.16	646
$6.99 (the reel's price)	**50%**	**$0.66**	**153**
$7.99	50%	$1.16	87
$8.99	50%	$1.66	61
$9.98	50%	$2.15	47
$9.99	60%	$3.15	32
$12.99	60%	$4.95	21

- The lowest price KDP will accept for this book on Amazon.com is $2.84 / 0.50 = **$5.68**.
- Page count does not change the cost anywhere from 24 to 110 pages. Above 110 pages the cost becomes $1.00 + $0.017 per page (120 pages = $3.04).
- UK at GBP 6.99: 0.50 x 6.99 - 2.15 = **GBP 1.35** per copy (60% starts at GBP 7.99, which pays GBP 2.64). EU (for example Amazon.de) at EUR 6.99: 0.50 x 6.99 - 2.48 = **EUR 1.02** (60% starts at EUR 9.99, which pays EUR 3.51). Using the same "6.99" number in each currency is an assumption for comparison, not a recommendation. KDP says that in some marketplaces Amazon adds VAT on top of the list price you enter, so shoppers there see a higher price.
- The $9.99 line matters: going from $9.98 to $9.99 raises your royalty by a dollar, because the whole price moves to the 60% rate.

Is it real?

Yes, the mechanics are real. KDP accepts coloring books made with AI images as long as you disclose the AI use when you upload (KDP Content Guidelines (https://kdp.amazon.com/en_US/help/topic/G200672390)). Amazon prints each copy when someone orders it and ships it; you hold no stock and pay nothing up front (Start publishing with KDP (https://kdp.amazon.com/en_US/help/topic/GHKDSCW2KQ3K4UU4)).

What the reel gets wrong

The reel says	What is actually true
"You get to collect 60% royalties"	At $6.99 the rate is 50%. And the royalty is the rate times the price **minus the $2.84 printing cost**, so you get $0.66, not the $4.19 that "60% of $6.99" suggests.
"This one has sold over 34,000 copies"	The reel's own screen shows where the number comes from. The book page reads "4.8 stars (34,195)". That is the count of **customer ratings**. The next shot shows a calculator doing 34195 x 6.99 = 239023.05. Ratings are not sales, and price times copies is what buyers paid, not what the publisher kept. Amazon does not publish anyone's sales counts. Even if every rating were a sale, a $6.99 book with your specs would have paid its publisher about $22,400, not $239,023.
The example book	The book shown is "Hopscotch Girls I Am Confident Brave & Beautiful" coloring book. Its page describes it as part of a 10-book series from "a small business brand". It is not a book made in a few minutes with an AI tool. The address bar shows product number 0692927999.
"In just a few minutes, you have a coloring book like this ready to go"	EveryGen makes single images. None of its public pages mention page layout, trim size, bleed or PDF export. The reel's own screen shows a cover and five pages. A sellable book is roughly 25 to 50 designs, cleaned up, laid out and exported to KDP's print specs. That is most of the day in the plan below.
"Amazon handles printing and shipping all over the world"	True for Amazon's own marketplaces. Coloring books are explicitly excluded from KDP's Expanded Distribution to bookstores and other retailers (Expanded Distribution (https://kdp.amazon.com/en_US/help/topic/GQTT4W3T5AYK7L45)).
(not mentioned)	The caption carries the hashtag #everygenpartner. The creator is promoting EveryGen as a partner.

Is it free?

- **KDP itself: yes.** There is no sign-up, listing or monthly fee. The printing cost is taken out of each sale, never billed to you.
- **EveryGen, the tool in the reel: no.** It has no free plan. The cheapest plan is $14 a month **billed annually** ($168 paid up front) (EveryGen pricing (https://everygen.ai/pricing)).
- **Adding EveryGen to Claude: free.** Claude's free plan allows one custom connector (Claude help (https://support.claude.com/en/articles/11175166-get-started-with-custom-connectors-using-remote-mcp)).

Can it be made free?

Yes, with no cash cost at all:

- **Art:** Adobe Firefly's free coloring-page generator, or Stable Diffusion run on your own PC.
- **Cleanup:** GIMP.
- **Layout and PDF export:** Scribus.
- **Cover:** KDP's own Cover Creator or its Cover Calculator template.

The catches:

- Adobe does not publish how many free generations you get per day.
- Running Stable Diffusion yourself needs a capable graphics card, and you have to choose and download a model yourself.

The day plan below uses the free path by default.

What the reel leaves out

- **The AI disclosure.** You must tell KDP at upload that the images are AI-generated. Shoppers never see it (Content Guidelines (https://kdp.amazon.com/en_US/help/topic/G200672390)).
- **No copyright protection.** In the US, purely AI-generated images cannot be copyrighted (U.S. Copyright Office on AI (https://www.copyright.gov/ai/)). You can still sell them, but anyone can copy your pages and sell them too.
- **A weekly limit.** Since 21 September 2026, KDP lets you create only **2 new paperbacks per week** (the count resets Sunday 00:00 UTC) (Paperback Submission Guidelines (https://kdp.amazon.com/en_US/help/topic/G201857950)). Scaling up to many books quickly is no longer possible.
- **Competition, and no independent earnings data.** Generic "kids coloring book" themes are described as saturated, even by companies that sell tools into this niche. No independent earnings data for coloring books was found; every niche income figure seen came from people selling tools or courses. The closest independent figure covers all self-published authors: a median of $12,749 a year in the 2022 Alliance of Independent Authors survey, with about a quarter earning $0 to $1,000 (Self-Publishing Advice (https://selfpublishingadvice.org/income-survey-2023-media-links/)).
- **Payment lag.** KDP pays about 60 days after the end of the month of the sale (Payment Thresholds (https://kdp.amazon.com/en_US/help/topic/G201207800)).
- **US tax withholding for non-US publishers.** If you live outside the US and do not complete the tax interview properly, 30% of your US royalties are withheld (Tax Withholding (https://kdp.amazon.com/en_US/help/topic/G201274690)).

Bottom line: You can get a real book on sale in one day without spending money. It is a slow way to earn: at $6.99 each sale pays 66 cents, and no evidence was found of what a new coloring book typically sells.

---

2. Before you start (15 minutes)

Have these ready

1. An email address and a mobile phone, for sign-in codes and KDP's two-step verification.
2. Your legal name and postal address.
3. Your tax number:
    - US citizen or resident: your SSN or EIN.
    - Everyone else: the tax ID number your own country issued you, plus a US TIN if you have one.
4. Bank account details for receiving money. The account holder name must match the name you give KDP.
5. A Windows or Mac computer with a few GB of free disk space.
6. A payment card, but only if you choose the paid EveryGen path.

The book you are making (decided for you)

Setting	Value	Why
Format	Paperback	Coloring books are used on paper.
Trim size	8.5 x 11 in	The reel's format. It counts as a "large trim" size, and printing costs a flat $2.84 up to 110 pages.
Interior	Black & white, white paper	Line art needs nothing more, and it is the cheapest ink option.
Bleed	No bleed	Coloring pages have white margins, so nothing needs to print to the edge. With no bleed, the PDF page is exactly 8.5 x 11 in.
Margins	0.5 in on all four sides	This is more than KDP's minimums: 0.375 in on the inside edge for 24 to 150 pages, and 0.25 in on the outside edges without bleed (Trim, Bleed and Margins (https://kdp.amazon.com/en_US/help/topic/GVBQ3CMEQW3W2VL6)).
Art area per page	7.5 x 10 in, which is **2250 x 3000 pixels** at 300 DPI	KDP requires images of at least 300 DPI (Cover and image requirements (https://kdp.amazon.com/en_US/help/topic/G201953020)).
Designs	30	
Page count	**62**	Page 1 is the title page and page 2 is a "this book belongs to" page. The 30 designs go on the right-hand pages (3, 5, 7 ... 61). The back of each design (4, 6 ... 62) has only a small "test your colors" box, so markers do not bleed onto another design.
ISBN	Free KDP ISBN	Costs nothing. It can only be used for printing through KDP.

Setting	Value	Why
Low-content checkbox	**Leave it unticked**	KDP says coloring books are generally not low-content books. Ticking it also costs you the free ISBN (Low-Content Books (https://kdp.amazon.com/en_US/help/topic/GGE5T76TWKA85DJM)).
Expanded Distribution	**Leave it unticked**	Coloring books are excluded.

About the backs of the pages: KDP lists "excessive blank pages" as a common reason for failing review, but does not say how many is too many (Paperback Submission Guidelines (https://kdp.amazon.com/en_US/help/topic/G201857950)). The "test your colors" box means none of the 62 pages is blank.

If you would rather print designs on both sides, 62 pages becomes 60 designs, and you need twice the art and cleanup time. The printing cost stays the same.

Choose your art path

Path	Cash cost	The catch	Use it when
A. Adobe Firefly coloring-page generator (free Adobe account)	$0	Adobe's page promises "free daily generations" but gives no number. Output size and watermark policy are also not stated on that page.	**Default for today.**
B. EveryGen inside Claude (the reel's method)	From $14/month billed annually ($168 up front)	No free plan. Credits do not roll over from month to month. The output image size is not published.	You want the reel's exact workflow, or Firefly's free allowance runs out.
C. Stable Diffusion on your own PC (ComfyUI)	$0	Needs a capable graphics card, and you must choose and download a model yourself. No specific model was checked, so this guide does not name one.	You already run it, or you want unlimited pages later. It is not a one-day setup from scratch.

---

3. The day plan

Times are counted from when you start. The whole day is about 10 hours of work, including a 30-minute break.

A note on button names: names in **bold** come from KDP's, EveryGen's, Adobe's or Anthropic's own help pages, or from the screens shown in the reel. None of them were checked inside a live KDP account, though. Where a label could not be checked, the step says "label may differ" and describes what to look for.

Block	Time	Done at the end of it
1	0:00 - 0:40	KDP account open, two-step verification on, bank account added
2	0:40 - 1:10	Tax interview submitted
3	1:10 - 1:40	GIMP and Scribus installed, art tool ready
4	1:40 - 4:10	30 designs and 1 cover image downloaded
Break	4:10 - 4:40	
5	4:40 - 6:40	30 pages cleaned to pure black and white at 300 DPI
6	6:40 - 7:40	62-page print-ready interior PDF
7	7:40 - 8:20	KDP "Paperback Details" filled in
8	8:20 - 9:20	ISBN, print options, interior, cover, AI disclosure, previewer approved
9	9:20 - 9:40	Price and territories set, book submitted
After	up to 72 hours, or up to 5 days outside the US store	Book goes live. This part is out of your hands.

Block 1 (0:00 - 0:40): Open and verify the KDP account

Source for this block: Create a KDP Account (https://kdp.amazon.com/en_US/help/topic/G200620010).

1. **Open KDP.** Go to kdp.amazon.com/en_US/ (https://kdp.amazon.com/en_US/).
    - **You should see:** "Welcome to Kindle Direct Publishing" with a yellow **Join KDP** button and a **Sign in** button. This is the page shown in the reel.
2. **Create the account.** Click **Join KDP**. KDP's help page calls this step **Sign up**, then **Create your KDP account**.
    - If you already have an Amazon shopping account, you can sign in with it.
    - If not, type your name, email address and a password.
    - Amazon may email you a code to confirm your address. Type it in when asked.
3. **Check where you land.** Accept the KDP terms if they are shown.
    - **You should see:** your **Bookshelf**, which has a **+ Create** button. There is probably a notice asking you to complete your account information.
4. **Fill in your account details.** Open **Your Account** and fill in the author/publisher information:
    - **Business type:** Individual (unless you are publishing as a company).
    - **Legal first and last name:** your real legal name. KDP does not allow a pen name here. A pen name can go on the book itself in Block 7.
    - **Address:** your mailing address for tax and payments.
    - Click **Save**.

5. **Turn on two-step verification.** Scroll to **Getting Paid**. KDP makes you complete **two-step verification** first. Add your phone number or an authenticator app, then type the code it sends.
    - **You should see:** the Getting Paid section becomes editable.
6. **Add your bank account.** Click **Add a bank account**.
    - Choose your bank's country.
    - Type the account holder name exactly as the bank has it. If it does not match your KDP name, payments can fail.
    - Type the account number and whichever routing, sort, IBAN or SWIFT codes the form asks for.
    - Click **Add**, then **Save**.
7. **Out of your hands: identity check.** KDP's help page says: "After adding your account, we may ask you to verify your identity." If you get that request, follow it. KDP does not publish how long it takes, or whether it stops you publishing while it is pending. Carry on with the day either way.

Block 2 (0:40 - 1:10): The tax interview

Sources for this block: Tax Information Interview Guide (https://account.kdp.amazon.com/tax-interview/help?nodeId=201447640&locale=en_US) and Tax Withholding (https://kdp.amazon.com/en_US/help/topic/G201274690).

1. **Start the interview.** In **Your Account**, go to **Tax Information** and click **Complete Tax Profile**. The interview opens.
2. **Choose individual.** Answer that you are an individual, unless you set up a business.
3. **If you are a US citizen or US resident,** you are filling in Form W-9:
    - Type your name.
    - Choose the individual / sole proprietor tax classification.
    - Enter your SSN (or EIN).
    - Agree to electronic signature and to receiving Form 1099 electronically.
    - There are no treaty questions.
4. **If you are not a US person,** you are filling in Form W-8BEN:
    - Give your country of citizenship and your permanent address.
    - To cut the default 30% US withholding, enter the tax ID your own country issued you (or a US TIN if you have one), and claim the tax treaty benefit for your country when asked.
    - The reduced rate depends on your country's treaty with the US. The interview shows the rate that applies to you, so read it there rather than assuming a number.
5. **Sign and submit.** Sign electronically and submit.
    - **You should see:** a summary that includes your withholding rate, and the Tax Information section marked as done.
6. **Set a reminder.** A W-8BEN expires on the last day of the third calendar year after you sign it. A form signed in 2026 expires on 31 December 2029. If it lapses, withholding goes back to 30%.
7. **How you get paid.** Royalties add up separately for each Amazon marketplace, in that marketplace's currency.

- Direct deposit has no minimum.
- Payment arrives 60 days after the end of the month of the sale. For example, October sales are paid around the end of December (Payment Thresholds (https://kdp.amazon.com/en_US/help/topic/G201207800)).

Block 3 (1:10 - 1:40): Install the tools and set up your art path

1. **Install GIMP** (free, for cleaning images). Go to gimp.org (https://www.gimp.org), download the installer for your system and install it.
   - **You should see:** when it opens, a window with the menus File, Edit, Select, View, Image, Layer, Colors, Tools, Filters.
2. **Install Scribus** (free, for page layout and PDF export). Go to scribus.cc (https://scribus.cc/), download the current stable version for your system and install it.
   - **You should see:** when it opens, a "New Document" window. Close it for now.
3. **Make your folders.** Create a folder called `coloring-book` with three folders inside it: `raw`, `clean` and `cover`.
4. **Set up one art path** (A, B or C below).

Path A: Adobe Firefly (free, default)

1. **Open the generator.** Go to Adobe Firefly coloring page generator (https://www.adobe.com/products/firefly/features/ai-drawing-generator/coloring-page.html).
2. **Sign in.** Log in with an Adobe ID, or create a free account.
3. **Open image generation.** Select **Generate Image**.
   - **You should see:** a prompt box, plus a settings panel that includes **Effects**.
4. **Read Adobe's rules once.** Adobe's page says you can use its coloring pages "in published coloring books", provided you follow the Adobe Generative AI User Guidelines (https://www.adobe.com/legal/licenses-terms/adobe-gen-ai-user-guidelines.html) and use "the commercially released version of Firefly". So use the regular generator, not any feature marked beta.

Path B: EveryGen inside Claude (paid, the reel's method)

1. **Pick a plan.** Go to everygen.ai/pricing (https://everygen.ai/pricing). The plans are in Section 4.
   - One book needs about 40 images: 30 designs, 1 cover and roughly 9 retries.
   - EveryGen's own figures work out to about 4 credits per "Nano Banana Pro" image. That makes about 160 credits, which fits inside the Basic plan's 200.
   - The reel's screen appears to read "13 credits for all six" (a cover and five pages), so some models cost less. EveryGen does not publish a per-model price list.
2. **Subscribe.** Pay for the plan. Note that the $14 price is **billed annually**.
3. **Open Claude's connector settings.** In the Claude app or at claude.ai, go to **Customize > Connectors** and click **+**, then **Add custom connector** (Claude help (https://support.claude.com/en/articles/11175166-get-started-with-custom-connectors-using-remote-mcp)).

4. **Add EveryGen.** Type `Everygen` in the name field and `https://everygen.ai/api/mcp` in the URL field. These values come from EveryGen's own connection page (https://everygen.ai/mcp) and match the reel.
    - Click **Add**. The dialog shown in the reel labels this button **Continue**.
5. **Sign in to EveryGen.** Sign in when the EveryGen window opens.
    - **You should see:** Everygen in your list of connectors.
6. **Check this first: output size.** None of EveryGen's public pages say how images are delivered or how large they are, and this could not be tested without paying. Download your first image and check its size in pixels before making the rest. You want 2250 x 3000, or close to it.

Path C: Stable Diffusion on your own PC (free, not a one-day start)

- **Install ComfyUI.** The ComfyUI project page (https://github.com/comfyanonymous/ComfyUI) offers a desktop app for Windows and Mac at comfy.org/download (https://www.comfy.org/download), and a portable Windows package. Model files go in `ComfyUI\models\checkpoints`.
- **Choose a model yourself.** No line-art model's quality or license was checked, so this guide does not name one.
- **Licensing:** the original Stable Diffusion license says "Licensor claims no rights in the Output You generate" (license text (https://github.com/CompVis/stable-diffusion/blob/main/LICENSE)). The newer SD3 and 3.5 models need a paid enterprise license only above $1 million a year in revenue.

Block 4 (1:40 - 4:10): Generate 30 designs and the cover art

1. **Pick one specific theme.** For example, the reel's own demo used "fairies and garden gnomes". Specific themes are said to do better than generic "kids coloring" books, but that claim comes from tool sellers, not independent data.
    - Do not pick any character, film, toy or brand you did not create.
2. **Use this page prompt.** Type it into Firefly, or ask Claude to use EveryGen with it. Change only the subject each time:

    ```
    Coloring page for children ages 4 to 8: [one subject, e.g. a gnome watering sunflowers]. Black outlines on a pure white background, thick clean lines, simple large shapes, no shading, no gray, no color, no text or letters, whole subject in frame, portrait.
    ```

    - In Firefly, open **Effects** and try **Line Drawing**, **Ink** or **Sketch**. Keep whichever gives the cleanest outlines.
    - If the tool lets you choose an aspect ratio, pick **portrait 3:4**. The 7.5 x 10 in art area is exactly 3:4.
3. **Make extras.** Generate until you have 30 keepers plus about 5 spares.
4. **Reject any image with these faults:**
    - letters or fake writing;
    - gray fill or shading;
    - broken or doubled lines;

    - wrong hands, limbs or faces;
    - anything that looks like a known character or logo.
5. **Save and check sizes.** Download each keeper as PNG into `raw` and name them `page-01.png` to `page-30.png`.
    - Check the pixel size of the first one. On Windows: right-click the file, choose **Properties**, open the **Details** tab and read **Dimensions**.
    - Write the size down. Block 5 fixes whatever size you got.
6. **Make the cover art.** Generate one full-color image:

    ```
    Bright, colorful children's book cover illustration of [your theme], flat colors, cheerful, no text, no letters, portrait.
    ```

    - Save it into `cover`. Do not let the AI draw the title, because AI lettering is usually garbled. You add the title in Cover Creator.
    - A full front cover at KDP's 300 DPI needs about 2588 x 3375 pixels. A much smaller image will print soft.
    - If that is a problem, Cover Creator has its own image gallery you can use instead.
7. **Out of your hands: Firefly's daily limit.** If Firefly stops you at its free daily limit before you have 30 designs, you have three choices:
    - finish tomorrow, and the book goes live a day later;
    - switch to Path B;
    - publish fewer designs. KDP's minimum is 24 pages, which is 11 designs with backs plus 2 front pages. That is a thin book for the price.

Block 5 (4:40 - 6:40): Clean each page in GIMP (about 4 minutes a page)

Do these steps for each file in `raw`:

1. **Open it.** Use **File > Open**.
2. **Make it grayscale.** Use **Image > Mode > Grayscale**.
3. **Set the size and resolution.** Open **Image > Scale Image**.
    - First set **X resolution** and **Y resolution** to **300** pixels/in.
    - With the chain icon locked, set **Width** to **2250** px. If **Height** comes out above 3000, set Height to **3000** instead.
    - Set **Interpolation** to **Cubic** (or NoHalo), then click **Scale**.
4. **Check the lines.** Use **View > Zoom > 1:1** to look at the lines at actual size. If you enlarged the image a lot (more than about 2x), lines will look soft. The next step hardens them.
5. **Force pure black and white.** Open **Colors > Threshold** and drag the slider until every line is solid black and the background has no gray specks. Click **OK**.
    - **You should see:** only pure black and pure white.
6. **Fix faults.**

    - Use **Filters > Enhance > Despeckle** for leftover dots.
    - Use the **Eraser** (Shift+E) to remove specks, stray lettering or a malformed detail.
    - Close gaps in outlines with the **Pencil** tool (N), in black at 6 to 10 px, so color does not run out of a shape.
7. **Export it.** Use **File > Export As**, choose the `clean` folder, keep the same name (for example `page-01.png`) and click **Export**. In the PNG options, keep **Save resolution** ticked and click **Export**.
8. **Close without saving.** Use **File > Close** and choose **Discard Changes**. You do not need GIMP's own file format.

For the cover image: keep it in color and skip Threshold. Use **Image > Scale Image** at 300 pixels/in, aiming for at least 2588 pixels wide, then export it as `cover\front.png`.

Block 6 (6:40 - 7:40): Lay out the interior in Scribus and export the PDF

KDP's rules for the file:

- It must be one page per PDF page, not two-page spreads.
- It must have no crop marks or trim marks.
- All fonts must be embedded (Paperback Submission Guidelines (https://kdp.amazon.com/en_US/help/topic/G201857950)).

Menu names below are from Scribus 1.6. If your version labels something differently, the numbers are what matter.

1. **Create the document.** Open Scribus. In **New Document**, set:
    - **Document Layout:** Single Page.
    - **Size:** Letter, portrait. Set **Units** to **Inches** and confirm it reads 8.5 x 11. If Letter is missing, choose Custom and type 8.5 and 11.
    - **Margin Guides:** Top 0.5, Bottom 0.5, Left 0.5, Right 0.5.
    - **Bleeds:** all 0.
    - **Number of pages:** 62.
    - Untick automatic text frames.
    - Click **OK**.
    - **You should see:** page 1 with a margin box 0.5 in inside each edge.
2. **Save it.** Use **File > Save As** and save it as `coloring-book.sla`. Save often from here on.
3. **Page 1, the title page.** Use **Insert > Text Frame**, draw it inside the margins, and type the book title and your author name. Change the font size in **Windows > Properties** (F2).
4. **Page 2.** Add a text frame reading `This book belongs to: _____`.
5. **The backs of the design pages.**
    - Open **Edit > Master Pages**, create a new master page named `Back`, and put a text frame reading `Test your colors here` above a rectangle (**Insert > Shape**, black line, no fill). Close the master page editor.
    - Open **Page > Apply Master Page**, choose `Back`, apply it to **even pages**, from page **4** to **62**.
    - **You should see:** the box on every even page from 4 to 62.

6. **The design pages.** Design number N goes on page 2N+1: design 1 on page 3, design 30 on page 61.
    - On page 3, use **Insert > Image Frame**. In **Properties**, on the X, Y, Z tab, set **X-Pos 0.5**, **Y-Pos 0.5**, **Width 7.5**, **Height 10**.
    - Right-click the frame, choose **Get Image** (Ctrl+D) and pick `clean\page-01.png`. Then right-click and choose **Image > Adjust Image to Frame**, or on the Properties Image tab tick **Scale To Frame Size** and **Proportional**.
    - Copy the frame (Ctrl+C), go to page 5, paste (Ctrl+V), reset X and Y to 0.5 in Properties, and use Ctrl+D to load `page-02.png`.
    - Repeat through page 61.
7. **Fix any preflight problems.** If Scribus shows a **Preflight Verifier** window listing problems such as missing images or low resolution, fix them before exporting.
8. **Export the PDF.** Use **File > Export > Save as PDF** and set:
    - **General tab:** Export range = All pages. Compatibility = **PDF 1.4**. Image compression = **Lossless**. Leave **Maximum Image Resolution** unticked, so your 300 DPI images are not shrunk.
    - **Fonts tab:** embed all fonts.
    - **Pre-Press tab:** untick every printer mark (crop, bleed and registration marks, color bars, page info). Leave bleeds at 0.
    - **Color tab:** if a Grayscale output option exists, choose it. Otherwise leave the default.
    - Click **Save**, and name the file `coloring-book-interior.pdf`.
9. **Check the PDF.** Open it.
    - **You should see:** 62 pages. The document properties show a page size of 8.5 x 11 in. At 100% zoom, the lines on a design page are crisp.

Block 7 (7:40 - 8:20): KDP "Paperback Details"

1. **Start the paperback.** Sign in at kdp.amazon.com/en_US/ (https://kdp.amazon.com/en_US/). On the Bookshelf, click **+ Create** and choose the paperback option.
    - **You should see:** a form with three sections across the top: Details, Content, and Rights & Pricing. The exact tab names may differ.
2. **Language:** English.
3. **Book title:** plain words that describe the book, for example `Fairies and Garden Gnomes Coloring Book`.
    - Do not use a trademarked name or words like "bestselling" (Metadata Guidelines (https://kdp.amazon.com/en_US/help/topic/G201097560)).
    - Use exactly the same wording on the cover.
4. **Subtitle:** for example `30 Simple Designs for Kids Ages 4-8`.
5. **Series and edition number:** leave blank.
6. **Author:** the name to print on the book. This can be a pen name.
7. **Description:** 3 to 5 plain sentences covering what is inside, the age range, that designs are printed on one side, and the 8.5 x 11 in size.
    - Do not mention other authors or books, sales rank, or "free".

8. **Publishing rights:** choose the option saying you own the copyright and hold the publishing rights. The other option is for republishing public-domain works, which this is not.
    - Remember that raw AI images carry no US copyright. Your right to publish them comes from the tool's terms.
9. **Primary audience:** answer **No** to sexually explicit content. Reading age: 4 to 8 (optional).
10. **Categories:** open the category chooser, search for "coloring", and pick up to three children's coloring or activity categories that truly describe the book. Misleading categories are against the rules.
11. **Keywords (up to 7 boxes):** short phrases a parent would type, for example `fairy coloring book for kids`, `gnome coloring pages`, `garden coloring book ages 4-8`.
    - No trademarks, no other authors or titles, no "bestseller" or "free", and nothing unrelated to the book.
12. **Low-content book:** leave **unticked**. **Large print:** unticked.
13. **Publication date:** leave blank.
14. **Save and continue.** Click **Save and Continue**.
    - **You should see:** the Content section.
    - This book is 1 of your 2 new paperbacks allowed this week.

Block 8 (8:20 - 9:20): KDP "Paperback Content"

1. **ISBN.** Click the button to get a **free KDP ISBN** and confirm (label may differ).
    - **You should see:** a 13-digit ISBN, with the imprint "Independently published".
    - This ISBN only works for KDP printing (ISBN help (https://kdp.amazon.com/en_US/help/topic/GTJ8LBXL6Z4WV5QX)).
2. **Print options:**
    - **Ink and paper type:** Black & white interior, white paper.
    - **Trim size:** open the size chooser and pick **8.5 x 11 in (21.59 x 27.94 cm)**.
    - **Bleed settings: No Bleed**.
    - **Cover finish:** Matte or Glossy. Either is fine; KDP's cost tables do not vary by finish.
3. **Upload the interior.** Click **Upload paperback manuscript** and choose `coloring-book-interior.pdf` (Upload and Preview (https://kdp.amazon.com/en_US/help/topic/G200641240)). Wait until KDP reports the upload succeeded, which can take a few minutes.
4. **Make the cover.** Two options:

    Option 1, recommended for today: Cover Creator. It is free and runs inside KDP. It only works after the interior has uploaded, because the spine width depends on the page count (Cover Creator (https://kdp.amazon.com/help?topicId=G201113520)).

    1. Click **Launch Cover Creator**.
    2. Upload `cover\front.png` (JPG, PNG or TIFF, at least 300 DPI) or pick an image from its gallery.
    3. Choose a template, then a layout.
    4. Set the title, subtitle and author fonts on the front.

5. On the back, replace the placeholder text with two short sentences about the book.
6. Click **Save**, then **Preview**, then **Save and submit**.

At 62 pages there is no spine text; Cover Creator needs 80 pages or more for that. KDP adds the barcode itself.

Option 2: your own cover PDF.

1. Open the KDP Cover Calculator (https://kdp.amazon.com/cover-calculator). Enter Paperback, Black & white, White paper, 8.5 x 11 in, **62** pages, inches, then download the template.
2. By KDP's formula (spine = pages x 0.002252 in for white paper), the spine is about 0.14 in and the full wrap is about **17.39 x 11.25 in**, or 5217 x 3375 pixels at 300 DPI. If the calculator's numbers differ from these, use the calculator's.
3. Build the cover in GIMP on top of the template. Leave 0.125 in of bleed on the outside edges, keep all text at least 0.125 in inside the trim lines, and leave the barcode area empty.
4. Export it as a single PDF.
5. In KDP, choose to upload a print-ready cover PDF you already have (Cover requirements (https://kdp.amazon.com/en_US/help/topic/G201953020), Barcodes (https://kdp.amazon.com/en_US/help/topic/G5HDYGP4BXLX4RUW)).

5. **AI-generated content: answer Yes.** KDP's rule is that content is AI-generated if an AI tool created the first version, "even if you applied substantial edits afterwards." The answer is kept inside KDP and is not shown to shoppers (Content Guidelines (https://kdp.amazon.com/en_US/help/topic/G200672390)).

   The answer options below come from a third-party guide, not a KDP page. Your screen is the authority. Answer honestly:

   - **Texts: None**, if you wrote the title, description and every word printed in the book yourself.
   - **Images: "Many AI-generated images, with minimal or no editing."** Thresholding and removing specks counts as minimal editing. Choose "with extensive editing" only if you redrew large parts by hand. The cover counts as an image.
   - **Translations: None.**

6. **Run the previewer.** Click **Launch Previewer** and page through all 62 pages.

   - If it lists problems, such as content outside the margins or low image resolution, fix them in Scribus or GIMP, export again, upload again and relaunch.
   - When the previewer shows no problems, click **Approve** (label may differ).

7. **Check the printing cost.** It should read **$2.84** for Amazon.com. If it does not, recheck the trim size, the ink type and the page count.

8. **Save and continue.** Click **Save and Continue**.

Block 9 (9:20 - 9:40): Rights, price, and publish

1. **Territories:** all territories (worldwide rights). You hold the publishing rights everywhere.
2. **Primary marketplace:** Amazon.com.

3. **Price:** type the Amazon.com list price. Check the royalty KDP displays against the table in Section 1:
    - `6.99` should show about $0.66.
    - `9.99` should show about $3.15.
    - Then check or type the UK and EU prices. Remember the 60% thresholds there are GBP 7.99 and EUR 9.99.
4. **Expanded Distribution:** leave it unticked. Coloring books are not eligible.
5. **Printed proof (optional).** You can request a printed proof copy. It is marked "Not for Resale". You pay the printing cost ($2.84) plus shipping, and the shipping cost depends on your address and the speed you choose (Proof and Author Copies (https://kdp.amazon.com/en_US/help/topic/G7BBN68RYX5UMDZF)).
    - Waiting for a proof adds days that are out of your hands.
    - If you want the book submitted today, skip the proof and rely on the previewer.
6. **Publish.** Read the terms and click **Publish Your Paperback Book** (label may differ).
    - **You should see:** a confirmation, and your Bookshelf showing the book as **In review**.

After the day: the parts that are out of your hands

Source: KDP Timelines (https://kdp.amazon.com/en_US/help/topic/G202173620).

- **Review:** up to **72 hours** for Amazon.com, and up to **5 days** for other marketplaces. KDP checks the layout, margins and cover. The status then changes to **Live**.
- **Search:** it can take up to another **72 hours** before the book appears in Amazon search. A direct link to it works before then.
- **If the review finds a problem:** fix it and resubmit, which starts a new review.
- **Check the print quality:** once the book is live, order one author copy at printing cost plus shipping.
- **First payment:** about 60 days after the end of the month of your first sale.
- **Your next paperback:** you can create 2 new paperbacks per week, and the count resets on Sunday at 00:00 UTC.

---

4. Paid shortcuts: what each one buys

Shortcut	Real price	What it buys	What it does not buy	Hidden or not published
EveryGen Basic	$14/month **billed annually** = $168 up front. Month-to-month: $19.99 was read once, but did not appear again on a recheck.	200 credits/month, which the page equates to about 50 "Nano Banana Pro" images. That is enough for one 30-design book on that model.	Layout, PDF export, cover assembly or any KDP step.	Top-up pack prices are not listed. Credit cost for other models is not listed. Image size is not stated. Watermarking is not stated. The page's commercial-use sentence says "You can monetize **videos** made with Everygen without any restrictions"; it does not mention images or print books. Check the terms before you publish.
EveryGen Professional	$19/month billed annually = $228 up front, or $29.99 month to month	350 credits, about 87 images	Same as Basic	Same as Basic
EveryGen Creator	$49/month billed annually = $588 up front, or $69.99 month to month	800 credits, about 200 images	Same as Basic	Same as Basic
Colorin AI	From $11.99/month (pricing (https://colorin.ai/pricing/))	A commercial license for the coloring pages it generates. Its free trial gives 8 pages that **may not be sold**.	Not checked beyond pricing and license	Other plan details were not captured
Adobe Firefly paid plans	Not found	More generations than the free allowance		The free daily allowance and paid prices were not readable
Your own ISBN (Bowker, US)	Not found	Your own imprint name, and the right to use the same ISBN on other platforms	Anything on Amazon itself	KDP mentions a Bowker discount for KDP authors but no price

Shortcut	Real price	What it buys	What it does not buy	Hidden or not published
Printed proof copy	$2.84 printing plus shipping	A physical check before release		Shipping depends on destination and speed
Claude paid plan	Not needed	Claude's free plan allows one custom connector, which is enough for EveryGen		Claude plan prices were not checked

The reel also offers a "free guide" if you comment the word "Claude". That guide was not examined.

---

5. Never do these

1. **Never answer No to KDP's AI question** when the pages or the cover came from an AI tool. Failing to disclose is what KDP acts on; using AI is not (Content Guidelines (https://kdp.amazon.com/en_US/help/topic/G200672390)).
2. **Never use a trademarked name** (a cartoon, film, toy or brand) in the title, subtitle, keywords or on the pages. Never publish a generated page that looks like a known character. Doing so can get the book rejected or removed, can cost you royalties, and can hurt your account (Metadata Guidelines (https://kdp.amazon.com/en_US/help/topic/G201097560), Intellectual Property FAQ (https://kdp.amazon.com/en_US/help/topic/G200672400)).
3. **Never put these in keywords:** other authors' names, other books' titles, "bestseller", "free", or anything unrelated to the book. Never choose a misleading category (Metadata Guidelines (https://kdp.amazon.com/en_US/help/topic/G201097560)).
4. **Never upload art you have no right to sell.** That includes images from web searches or Pinterest, pages from another coloring book, and pages from a free tier that excludes commercial use, such as Colorin AI's free 8 pages (Intellectual Property FAQ (https://kdp.amazon.com/en_US/help/topic/G200672400)).
5. **Never publish pages with visible AI faults** such as fake lettering, broken lines or mangled hands. Under KDP's quality rules, critical problems take a book off sale, and continuing to add problem content "could affect your account status, up to and including termination" (Guide to Kindle Content Quality (https://kdp.amazon.com/en_US/help/topic/G200952510)).
6. **Never try to mass-produce thin, look-alike books.** KDP cut new titles to 2 per format per week on 21 September 2026. Outside coverage describes the cut as a response to AI-generated volume (Paperback Submission Guidelines (https://kdp.amazon.com/en_US/help/topic/G201857950), Self-Publishing Advice (https://selfpublishingadvice.org/amazon-cuts-kdp-weekly-upload-limit/), Publishers Lunch (https://lunch.publishersmarketplace.com/2026/09/kdp-limits-authors-to-two-new-titles-a-week/)).
7. **Never enroll a Kindle ebook of these pages in KDP Select while you sell the same pages as a digital file anywhere else**, such as Etsy, Gumroad or your own site. Select requires digital exclusivity

to Amazon, and Amazon can close the whole account over a breach. The paperback is not affected (KDP Select (https://kdp.amazon.com/en_US/help/topic/G200798990)).

8. **Never upload copyrighted content that is freely available on the web, or an unchanged public-domain book** (Content Guidelines (https://kdp.amazon.com/en_US/help/topic/G200672390)).
9. **Never upload a PDF with crop marks, two-page spreads or unembedded fonts.** The book fails review and you lose days (Paperback Submission Guidelines (https://kdp.amazon.com/en_US/help/topic/G201857950)).
10. **Never send this book to IngramSpark.** Its catalog rules prohibit "content generated using artificial intelligence" (IngramSpark announcement (https://www.ingramspark.com/blog/ingramsparks-catalog-integrity-announcement)).

---

6. Next week: sell the same pages elsewhere

The 30 cleaned pages can also be sold as a printable PDF. This is a digital sale, so nothing is printed or shipped, and it does not conflict with the KDP paperback. Rule 7 above is the one exception.

Comparison: money

Figures marked (s) come from secondary sources quoting the platform, because the platform's own page blocked automated reading.

Platform	Cost to join	Gate before selling	What you pay per sale	Payout
Gumroad	Free	None	10% + $0.50 on sales through your own link. 30% on sales found through Gumroad's Discover marketplace. Its pricing page does not say whether card processing is extra; secondary sources say about 2.9% + $0.30 is added.	Weekly on Fridays by default. $10 minimum once your identity is verified ($100 before). 7-day hold on new sales. (s)
Etsy, digital downloads (s)	Free shop. Some new sellers pay a one-time setup fee of about $15 (up to $29).	Photo ID check, which can take up to 24 hours	$0.20 per listing, 6.5% of the order total, and about 3% + $0.25 card processing (US). An Offsite Ads fee of 12 to 15% becomes mandatory above $10,000 in yearly sales.	Deposits to your bank

Platform	Cost to join	Gate before selling	What you pay per sale	Payout
Payhip (s)	Free plan. Paid plans are $29 or $99 a month.	None	5% on the free plan (2% or 0% on paid plans), plus Stripe or PayPal fees	Straight into your own Stripe or PayPal account
Lulu	Free	None	Lulu keeps 20% of print sales and 10% of ebook sales on its own store. Sales through its Global Distribution also lose the retailer's cut.	PayPal: $5 minimum, monthly. Check: $20 minimum, quarterly.
Teachers Pay Teachers (s)	$29 one-time (Basic) or $59.95 a year (Premium)	Paying the fee	Basic: you keep 55%, minus $0.30 per sale. Premium: you keep 80%, minus $0.15 on orders under $3.	Monthly, through Hyperwallet
Redbubble (s)	Free	Your account is sorted into a fee tier, which can take up to 5 business days	Platform fee of 50%, 20% or 0% depending on tier, capped at $150 per pay period	Monthly. Balances under about $10 roll over.
TeePublic (s)	Free	None	A fixed payout per item. About $4 per shirt at the "Artisan" seller level; about half that at the "Apprentice" level.	PayPal, or Payoneer ($20 minimum). Sources disagree on the minimum.
Amazon Merch on Demand (s)	Free	Application and invitation. Guides report waits of 2 to 12 weeks.	Tiered since June 2026. On a $19.99 shirt you get $2.44, $4.88 or $5.27, depending on how much of your traffic comes from outside Amazon.	Direct deposit with no minimum, about 60 days after the sale
IngramSpark	Free	None	A 1.875% market access fee, on top of the wholesale discount and printing cost	Not confirmed
Draft2Digital	$20 activation fee, plus $12 a year (waived if you earn $100 or more)	Activation fee and tax interview	About 10%	$10 minimum by domestic bank transfer or PayPal; $20 by international transfer or Payoneer

Platform	Cost to join	Gate before selling	What you pay per sale	Payout
Canva Creators (s)	Free	Portfolio application. Review can take up to about 2 months.	A share of a royalty pool, based on how much your templates are used	Through Trolley. $10 minimum ($25 by wire), paid on the 15th.

Comparison: fit for these pages

Platform	Time to first product live	AI rule	Fit for this coloring book
Gumroad	Minutes	AI-made products are allowed if you hold the rights. Selling access to AI tools, or reselling PLR (private label rights) content, is banned (prohibited list (https://gumroad.com/prohibited)).	**Good.** Sell the PDF. You must bring your own buyers.
Etsy (s)	Under an hour, plus up to 24 hours for the ID check	Allowed where your own creative input is central. You must disclose AI use. Bare AI output is not allowed.	**Good.** Buyers already search Etsy for printables. The category is crowded.
Payhip (s)	Same day	No AI policy found	Works, but has no marketplace traffic of its own
Lulu	Same day to a few days	No ban, but Lulu can suspend accounts that flood the site with AI content	A second print outlet with little traffic
Teachers Pay Teachers (s)	Same day, after the fee	No published AI policy. Teachers have complained about AI resources on the site (Chalkbeat, August 2026).	Possible for classroom coloring sheets
Redbubble / TeePublic (s)	Same day	Redbubble allows original AI designs if disclosed. TeePublic has no explicit AI policy.	For merchandise, not coloring pages
Amazon Merch on Demand (s)	Weeks to approval	No published blanket AI policy; you must hold the rights	For shirts. If you want it later, apply early because of the wait.
IngramSpark	1 to 3 weeks	**Prohibits AI-generated content**	**Do not use**
Draft2Digital	Hours to 2 weeks	Rejects fully AI-generated content that has not been extensively edited	**Do not use for this book**

Platform	Time to first product live	AI rule	Fit for this coloring book
Canva Creators (s)	Weeks to months	Canva's own AI tools are allowed; do not pass AI work off as human-made	Not for this book

The two picks:

- **Gumroad**, because it is free, you can be live in minutes, it allows AI-made products, and its fees were read directly from its own pages.
- **Etsy**, because buyers already go there looking for printables. Its fee and rules pages blocked automated reading, so its numbers are secondhand.

Preparation for both: a printable PDF (15 minutes)

1. **Export the design pages.** Open `coloring-book.sla` in Scribus and go to **File > Export > Save as PDF**. Under Export range choose **Choose pages** and type:

   ```
   1,3,5,7,9,11,13,15,17,19,21,23,25,27,29,31,33,35,37,39,41,43,45,47,49,51,53,55,57,59,61
   ```

   Save the file as `coloring-pages-printable.pdf`. It has 31 pages: the title page and the 30 designs, without the test-your-colors backs.

2. **Make preview images.** In GIMP, open 4 or 5 of your cleaned pages and export them as preview images for the listing. Also make one image that shows the cover art.

Gumroad setup, step by step (about 45 minutes)

Gumroad's help pages would not load when this was checked. Button names below come from its pricing page, or from its help-article titles as they appeared in search results, and may differ slightly on screen.

1. **Sign up.** Go to gumroad.com/pricing (https://gumroad.com/pricing) and click **Start selling**. Sign up with your email and a password, and confirm your email if asked.
   - **You should see:** your Gumroad dashboard.
2. **Start a product.** Open **Products** and click **New product**. Gumroad's help calls this "Add a product".
3. **Fill in the basics.**
   - **Name:** for example `Fairies and Garden Gnomes - 30 Printable Coloring Pages (PDF)`.
   - **Type:** Digital product.
   - **Price:** the price you want, in USD.
   - Continue to the product editor.
4. **Write the product page.**
   - In the description, say what the buyer gets: 31 pages, US Letter (8.5 x 11 in), one design per page, for personal printing.
   - Add one honest sentence such as `The illustrations were generated with Adobe Firefly, then cleaned up and arranged by me.`
   - Upload your cover image and preview images.

5. **Attach the file.** In the content section, click **Upload your files** and choose `coloring-pages-printable.pdf`.
6. **Publish.** Publish the product.
    - **You should see:** a public product link. Copy it from the page; do not type it.
7. **Set up payouts.** In your settings, find the payments section and add your bank account or PayPal. Gumroad's pricing page says the options depend on your country.
    - If you are outside the US, file a W-8BEN there. Otherwise the default 30% US withholding applies. (From secondary sources; Gumroad's own help page could not be opened.)
8. **Test the page.** Open your product link in a private browser window and check the page and the price.
9. **Know what a sale pays you.** At an example price of $5, Gumroad takes $1.00 (10% plus $0.50), leaving $4.00. If card processing of about 2.9% + $0.30 is also taken, you keep about $3.56. A sale that comes through Discover costs 30%.
    - Gumroad became merchant of record on 1 January 2025. It collects and pays sales tax and VAT on your sales for you.

Etsy setup, step by step (1 to 2 hours, plus up to 24 hours for the ID check)

Etsy's own pages refused automated reading. The fees and rules below come from several seller guides that quote Etsy. The screen names describe Etsy's usual seller sign-up and **could not be checked against the live site**. If a screen differs, the information it asks for will be the same.

1. **Start selling.** On etsy.com, choose **Sell on Etsy**, then **Get started**. Register or sign in.
2. **Shop preferences.** Set shop language, country and currency. Continue.
3. **Shop name.** Choose a name of letters and numbers, with no spaces.
4. **First listing.**
    - **Photos:** your cover image, 3 or 4 page previews, and one image that says what the buyer gets (31 pages, US Letter PDF).
    - **Title:** a plain description with no trademarks.
    - **About this listing:** who made it = **I did**; what it is = **a finished product**.
    - **Category:** search "coloring" and pick the coloring-pages or printables category.
    - **Type: Digital files**.
    - **Description:** what is inside, the page size, personal use only, and "instant download - nothing is shipped". Add the AI sentence: Etsy requires AI use to be disclosed in the listing, and such items carry a "Designed by" label rather than "Made by" (Etsy seller handbook on AI (https://www.etsy.com/seller-handbook/article/1275449912004), blocked to automated reading).
    - **Price.**
    - **Digital file:** upload `coloring-pages-printable.pdf`. Etsy limits file count and size; the limit was not rechecked. If the upload is refused, split the PDF in two.
5. **How you get paid.** Enter your bank's location, your personal details and your bank account.
    - Etsy asks for a government photo ID, and sometimes a selfie. The check can take up to 24 hours before you can sell. This is out of your hands.

6. **Billing.** Add a card for Etsy's fees. Some new sellers are charged a one-time setup fee of about $15 (up to $29, depending on country).
7. **Security.** Turn on two-factor sign-in if offered, then open your shop.
8. **Know what a sale pays you.** At an example price of $5 in the US, you pay $0.20 listing + $0.33 transaction fee + about $0.40 processing = about $0.93, and keep about $4.07.
    - Offsite Ads are optional until you pass $10,000 in yearly sales.
    - If you live outside the US, Etsy does not send you a US 1099-K, but you are responsible for your own country's VAT or GST rules.

Fee sources: Craftybase guide to Etsy fees (https://craftybase.com/blog/the-complete-guide-to-etsy-fees), eRank on the setup fee (https://help.erank.com/blog/understanding-etsys-new-15-setup-fee/), and Etsy fees policy (https://www.etsy.com/legal/fees/) (blocked to automated reading).

---

7. What this guide could not verify

- **The reel's example book:** its real sales and its real specs (page count, trim size). Amazon does not publish sales. Only its rating count (34,195) and its product number are visible in the reel.
- **Adobe Firefly's free allowance:** the number of free generations per day, the output resolution, and whether free-tier images carry a watermark. Adobe's page gives no numbers, and its credits FAQ refused automated reading.
- **EveryGen:** image output size, how images are downloaded, top-up pack prices, credit cost for models other than "Nano Banana Pro", watermarking, and whether its commercial-use sentence (which names videos) covers images in a printed book. Its month-to-month price for the Basic plan ($19.99) was read once but did not appear again on a recheck.
- **KDP screens:** the exact wording of the AI-disclosure answer options, which come from a third-party guide. The exact labels of a few buttons, marked "label may differ" above; no live KDP account was used.
- **KDP's own announcement of the weekly limit:** the KDP Community page would not load, so its exact wording comes from KDP's Paperback Submission Guidelines and two press write-ups.
- **KDP identity checks:** how long KDP's identity check takes, if one is triggered.
- **Printed proofs:** the shipping cost and delivery time.
- **Bowker ISBN prices** and **Adobe paid-plan prices.**
- **Gumroad:** whether card processing is charged on top of its fee (the pricing page is silent), and its exact screen labels.
- **Etsy:** all figures and screen names, because its pages blocked automated reading.
- **IngramSpark:** its payout method, minimum and schedule.
- **Earnings:** any independent earnings figures for coloring books or low-content books. None were found.
- **Stable Diffusion models:** which specific line-art model to use locally, and its license. None was checked.
