AI agent courses with badges and a realistic schedule

Researched 2026-11-12.

Strengths and best use

The seven-day list connects AI foundations with Claude Code, MongoDB, LangChain, Hugging Face agents and advanced MCP. Each can support a small build that provides more context than a credential name alone.

Current checks

The Google course named aloud is the Introduction to Generative AI microcourse. The screen shows a separate Google AI Professional Certificate. Claude Code 101 and Claude Platform 101 have different learning objectives. Hugging Face distinguishes its Unit 1 fundamentals route from full completion, which requires a use-case assignment and a final challenge. Its suggested pace is several hours per chapter.

Project idea

Choose a track and make a simple calendar. Confirm the provider's badge or assessment rules, credentials needed to follow along, and whether a cloud lab incurs usage costs. Pair a course with a small reproducible demo, then use the credential's exact name on a resume.

Reusable prompt

```
Build a course plan for six hours this week. Record each provider's credential type, prerequisites and estimated study time, and pair the first two courses with a demonstrable exercise.
```
