Remote freelance, testing, and AI evaluation work

Strengths and best use

The strongest use of these reels is to match a work format to an existing skill. Braintrust suits freelancers who can show relevant work. UserTesting and Userlytics suit people who can explain where a product is confusing. Respondent matches people to research interviews. AI evaluation rewards subject expertise and defensible judgments.

Official routes and payout details

- Braintrust (https://www.usebraintrust.com/for-talent) advertises no talent platform fee. Payment follows the client's invoice, and a bank or payment processor can charge its own fee.
- UserTesting (https://www.usertesting.com/get-paid-to-test) uses a practice step and shows the reward for each test. Contributor help says PayPal payment typically arrives 14 days after upload. Payment details (https://participant-support.usertesting.com/hc/en-us/articles/37633031351315-When-and-how-will-I-be-paid)
- Userlytics (https://www.userlytics.com/helpcenter/testers/when-will-i-get-paid/) describes periodic PayPal payments for approved tests. Respondent (https://www.respondent.io/become-a-participant) uses study screeners. It usually pays via Tremendous 7-10 business days after attendance confirmation and deducts 5% with a $1 minimum. Respondent payout details (https://help.respondent.io/en/articles/12552519-getting-paid-on-respondent-timeline-currencies-how-to-redeem)
- Clickworker (https://www.clickworker.com/clickworker/) lists individual tasks. Outlier (https://outlier.ai/faq) documents project assessment and weekly payment for completed work. Mercor (https://www.mercor.com/experts/) describes an AI interview. Consult each offer for geography, rate basis and availability.
- Other AI-evaluation routes include Alignerr (https://www.alignerr.com/), Surge (https://surgehq.ai/consultant-network), DataAnnotation (https://www.dataannotation.tech/), Meridial (https://job-boards.eu.greenhouse.io/agency), CrowdGen (https://crowdgen.com/), Mindrift (https://mindrift.ai/), and micro1 (https://www.micro1.ai/experts). The Toloka migration page (https://mindrift.ai/welcome) describes migration to Mindrift. CareerHound (https://www.careerhound.io) offers job discovery. Confirm any resulting role on the employer's board.

Project idea

Try one route for two weeks. Record invitations, screeners, assessments, paid tasks, rejected work, fees and cleared payments. Divide net receipts by all active time and report available assignments separately. Compare specialized roles using the same rubric and an original work sample. The reels' headline rates and interview-free claims need role-level evidence.

Reusable prompt

```
Build a two-week comparison using the available offers. Capture terms, unpaid effort,
accepted work, fees and cleared payment. Mark missing fields and compute effective earnings
from observed results.
```
