

Data Analyst to AI Engineer in 7 steps

From raw data to intelligent systems

	1. RAG: Complete Crash Course Build retrieval pipelines with LangChain, not toy demos. Learn the moving parts that make answers grounded. ▶ https://www.youtube.com/watch?v=o126p1QN_RI
	2. LLMs, Explained Briefly See what language models are doing beneath the hype. The clearest mental model you can build in 10 minutes. ▶ https://www.youtube.com/watch?v=LPZh9BOjkQs
	3. Prompt Engineering Deep Dive Write prompts that are specific, testable, and reusable. Less guesswork, better outputs, fewer wasted retries. ▶ https://www.youtube.com/watch?v=T9aRN5JkmL8
	4. Embeddings & Word2Vec Understand how machines turn meaning into vectors. The concept behind search, similarity, and modern RAG. ▶ https://www.youtube.com/watch?v=viZrOnJclY0
	5. AI Agents for Beginners Move from single prompts to systems that plan and act. A practical start before “agentic” becomes empty jargon. ▶ https://www.freecodecamp.org/news/ai-agents-for-beginners/
	6. LLM Fine-Tuning Course Learn when custom training is actually worth the effort. Go beyond prompting without burning compute blindly. ▶ https://www.youtube.com/watch?v=CcrC5zSv1iA
	7. Claude Code for Beginners Use an AI coding partner across real project workflows. Ship faster while staying responsible for the code. ▶ https://www.youtube.com/watch?v=gh2_PhGZGsM
